Interpreting the Hemoccult and Hemoccult SENSA tests.

### Hemoccult

#### Negative Smears

Sample Report: Negative
No detectable blue on or at the edge of the smears indicates the test is negative for occult blood.
(See Hemoccult Product Instructions – LIMITATIONS OF PROCEDURE.)

#### Negative and Positive Smears

#### Positive Smears

Sample Report: Positive
Any trace of blue on or at the edge of one or more of the smears indicates the test is positive for occult blood.

### Hemoccult SENSA

#### Negative Smears

Sample Report: Negative
No detectable blue on or at the edge of the smears indicates the test is negative for occult blood.
(See Hemoccult SENSA Product Instructions – LIMITATIONS OF PROCEDURE.)

#### Negative and Positive Smears

#### Positive Smears

Sample Report: Positive
Any trace of blue on or at the edge of one or more of the smears indicates the test is positive for occult blood.

### ON-SLIDE PERFORMANCE MONITORS FEATURE

- **Positive**
  A blue color will appear within 10 seconds after application of Developer and remain stable for at least 60 seconds if test system is functional.

- **Negative**
  No blue should appear after application of Developer if test system is functional.

Any blue originating from the Performance Monitors areas should be ignored when reading the specimen test results.

Neither the intensity nor the shade of blue from the positive Performance Monitors area, as illustrated, should be used as a reference for the appearance of positive test results.

*Above illustrations are an artist’s renditions. Each illustration shows two smears from a single fecal sample as displayed on a single Hemoccult or Hemoccult SENSA test card.*
Beckman Coulter Rapid Diagnostics Product Offering

**Hemoccult**
- CLIA-waived rapid tests for the detection of hidden blood in feces

**Hemoccult SENSA**
- CLIA-waived (urine) and moderately complex (serum) rapid tests for the detection of hCG

**Gastroccult**
- CLIA-waived rapid test for detecting hidden blood in gastric fluid and determining gastric pH

**ICON Hp**
- CLIA-waived (whole blood) and moderately complex (serum) rapid test for the detection of antibodies to H. pylori

**ICON 20 hCG**
- CLIA-waived (urine) and moderately complex (serum) rapid tests for the detection of hCG

**ICON 25 hCG**
- CLIA-waived (whole blood) and moderately complex (serum) antibody test for infectious mononucleosis

**ICON DS Strep A**
- CLIA-waived dipstick and cassette rapid format tests for the detection of Strep A, using throat swab sample

**ICON SC Strep A**
- CLIA-waived dipstick and cassette rapid format tests for the detection of Strep A, using throat swab sample

Beckman Coulter is the leader in fecal occult blood testing and offers the very best in rapid tests designed to simplify the diagnostic process. Early detection is the single most important advantage a patient can have to survive life-threatening diseases. Beckman Coulter provides the tools and tests physicians need to aid in the diagnosis and management of a variety of disease states.

Beckman Coulter also provides a variety of Immunoassay, Chemistry, Hematology and Centrifugation instruments to aid in the diagnosis and management of a full spectrum of medical conditions. Each system’s compact design and cost-effective performance makes it a perfect complement to a physician’s office laboratory.

To order product, contact your medical supply distributor. For technical assistance regarding rapid test kits, call Technical Marketing at 800-877-6242 or email askpcd@beckman.com.

*Exemplar CPT provided. Refer to regional CMS fee schedule for relevant/current CPT codes.*

For immunochemical testing, ask about Hemoccult ICT.
